1	Add the QVD repository	1
2	Install the QVD client	1
3	Execute the QVD client	1

1 Add the QVD repository

```
# rpm --import http://theqvd.com/packages/key/public.key
# zypper ar http://theqvd.com/packages/sles/12SP1/stable QVD
# zypper ref
```

2 Install the QVD client

```
# zypper install perl-QVD-Client
```

3 Execute the QVD client

Depending on the environment of the desktop, you should be able to access the client inside the menu "Applications", usually in the submenu "Internet". As an alternative, you can execute the GUI of the client from the console using the command `/usr/lib/qvd/bin/qvd-gui-client.pl`.
